

HANSE AEROSPACE e.V. – Holzmühlenstr. 84 – 22041 Hamburg

Hamburg logistics initiative and Hanse-Aerospace cooperation

Hanse-Aerospace e. V. became a member of the Hamburg Logistics Initiative in March 2008. As a quid pro quo the HWF - Hamburgische Gesellschaft für Wirtschaftsförderung mbH as the body responsible for the Hamburg Logistics Initiative - became a member of Hanse-Aerospace e. V.

— This initiative was started by the Hamburg labour authority and the city's business community to expand the city's role as a leading logistics location in northern Europe. This involves networking business, academia and R&D, emphasising the city's role as a logistics location in cooperation with the metropolitan conurbation's growth initiatives and comprehensive transfer of innovations to strengthen the market position of companies in the region. Joern Zimpel, member of the board of Hanse-Aerospace and manager of AG Logistik, has worked for the initiative from the start on behalf of Lufthansa Cargo. He considers mutual membership a very positive signal. „In aviation logistics in all forms from shipping to product lifecycle play a major role. Cooperation with the Logistics Initiative is hence a logical step for us“.
